

Design Matters at Every Scale

At PTD, we believe great design has the power to improve people's lives. Whether shaping a civic building, enhancing a neighborhood park, or designing the graphics on a public service vehicle, every project presents an opportunity to create environments that bring Balance, Beauty, and Delight to everyday life.

Our long-standing partnership with the City of Pleasant Ridge reflects this philosophy. From the design of park pavilions, the Community Center fitness spaces, and renovations to City Hall, to improvements at the Department of Public Works facility and even the graphics that define the City's police vehicles, each project has contributed to a cohesive civic identity rooted in thoughtful design.

While these projects vary in scale and scope, they are united by a common purpose: creating places that are functional, welcoming, and enduring. We believe the cumulative impact of good design extends far beyond individual buildings. It strengthens community identity, fosters civic pride, and enriches the daily experiences of the people who live, work, and gather there.
